

ENVIRONMENTAL POLICY

WPH Marine Construction acknowledges the impact its activities within the construction and civil engineering industry has on the environment and accepts its responsibilities and obligations to reduce its environmental impact by making a commitment to the sustainable development and promotion of environmental good practice.

To achieve this we aim to:

- Use recycled and recyclable materials where appropriate and purchase products from Suppliers that minimise negative environmental impact and promote sustainable development
- Work closely with clients to identify key environmental issues and seek appropriate alternatives where possible
- Actively promote appreciation of environmental issues to our employees and subcontractors and encourage them to apply good practice
- Adhere to regulations that protect natural habitats, local wildlife and preserve biological diversity
- Reduce the effect of noise, dust, disturbance and disturbance from operational activities
- Continually implement new best practice principles
- Continue to comply with all relevant legislation and codes of practice

The Managing Director is responsible for the effective implementation of this policy, but all employees and subcontractors must make a personal commitment to its success.

Signed on behalf of WPH Marine Construction

1 - APRIL - 2023

Ian Bone
Managing Director
